

European Desalination Society

Conference and Exhibition on
DESALINATION FOR THE ENVIRONMENT

17-20 May 2009

Kongresshaus, Baden-Baden, Germany

CLEAN WATER AND ENERGY

The bottom half of the cover features a photograph of a vast body of water, likely the sea, under a bright, cloudy sky. The sun is low on the horizon, creating a shimmering reflection on the water's surface. The overall color palette is dominated by blues and whites, with a warm, golden glow from the sun.

Water and energy are the issues of this millenium.

This conference on desalination for the environment will be devoted to advances towards providing fresh water for all, at affordable cost and at economical energy requirements. With limited and depleting natural sources, desalination can supplement some of the critically lacking amounts of water needed for sustainable development. Its place in the water cycle will be discussed.

The conference will overview the most recent developments in desalination technology, its cost and extent of application, including socio-economic and environmental issues. It will bring together research scientists, decision makers, managers, design engineers and operators from water companies, industries, government departments, consulting firms, research institutes and universities.

The place of industry, research and government decision making in this booming market will be addressed.

Why and how should desalination be integrated into the national or regional water management plans, ensuring socio-economic and environmental benefits, will be the focal point of the conference.

TECHNICAL PROGRAM

Socio-economic and environmental issues

- Water scarcity and environmental implications
- Desalination and water resource management
- Desalination projects, financing schemes
- Cost of desalination and water treatment
- Desalination and environmental impact
- Concentrate handling

Processes, problems, technological advances

- Feedwater pretreatment for desalination
- Seawater desalination by reverse osmosis
- Brackish water desalination
- Nanofiltration, Ultrafiltration, Microfiltration in water treatment processes
- Removal of specific compounds
- Membrane performance and maintenance
- Pre-treatment and Post-treatment of desalinated water
- Recent developments in desalination
- Advanced wastewater treatment
- Desalination and renewable energy sources
- Energy recovery technology
- Thermal seawater desalination
- Corrosion and scaling
- Materials selection

SCHEDULE May 2009

Sunday 17	Registration Welcome
Monday 18	Conference opening Exhibition opening Technical sessions
Tuesday 19	Technical sessions Conference dinner
Wednesday 20	Technical sessions
